

- System Registration:

This system is designed for registering university-specific exams and creating dynamic forms. Soon, dormitory registration will also be available in this system.

❖ Information Portal:

The college's information dissemination website will include sections such as publications, theses, and pages related to conferences and seminars.

❖ Desktop System:

The desktop system encompasses personnel management, salary and remuneration, and faculty recruitment.

❖ Ticketing System:

This system facilitates sending and receiving support requests, allowing students and staff to track their inquiries.

❖ Counseling Center System:

The counseling center system manages appointment scheduling and provides valid psychological assessments.

❖ Email Service:

This system offers email services for faculty and staff. In some cases, master's students can also create official college emails by paying a fee.

❖ Cloud Space:

The cloud space is used for uploading and managing files for staff and faculty members
